Androitroller
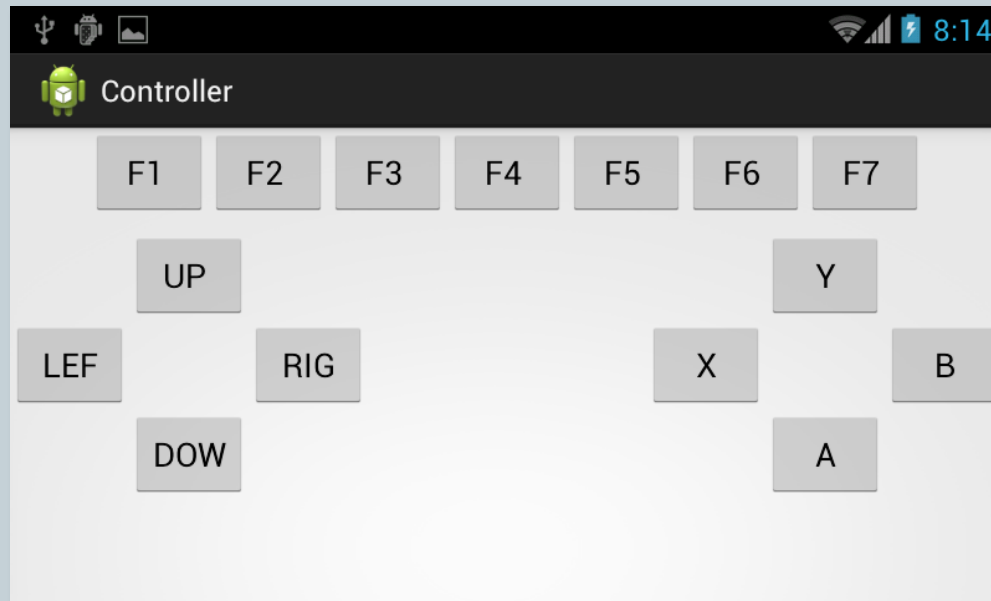

PROVIDING A CUSTOMIZABLE CONTROLLER EXPERIENCE TO ANDROID OWNERS.

TYLER KRAMER & ERIC NOBLE

The Main Idea

Androitroller provides user's with the ability to configure their ideal controller for PC gaming using their android device.

The Components

The Small-Scale Server – Connects the users device to Androitroller.

The Application – Allows for configuration of button locations, controller background, and button placement.

The Current Design

Goals Looking Forward

- ## A Visual Upgrade

  Custom graphics, branding, colour scheme.

- ## Enhanced Customization Upgrade

  Additional customization options, ability to move buttons.

- ## Streamlining and Improvement of User Interface

  Reimagining of user interface to improve useability and appeal.
